

Pugio PEN-15 AOW Blank firing Pen Gun Options

Product Code: Pugio AOW Blank firing Pen Gun

Availability: In Stock

Price: \$0.00

Description

The roots of the Aklys Defense Pugio AOW Blank only pen gun are traced from the Pugio dagger carried by Roman soldiers whom used it as a sidearm. Much like the Pugio (plural: *pugiones*) of old, the Aklys Defense Pugio provides a light and concealable device for use when in distress or for fun.... for rescue and only firing Blanks and flares. Julies Caesar probably could have used his own Aklys Pugio when the conspirators stabbed him in the back.... to signal for help, but not carried loaded.... ever...WE'RE SUPER SERIOUS ABOUT THAT!!!

The standard [PEN-15 Pugio \(purchase here w/discounted Mods\)](#), comes as 22LR Blank firing only, secondary Blank only caliber conversions are optional!

The standard Pugio barrels have threaded barrels and a thread protector included at no additional charge!

Here is the customize the aesthetics of your Pugio with spare buttstocks, custom buttstocks, or different barrel/tip and clip options! Pens will ONLY ship in the standard configuration to your preferred NFA Dealer (place in notes). All options are additional items and NOT open for standard substitutions so as to not delay your Form 3/4 start! Some options are and will be very custom so if the Options/Mods are not available to ship at the Form 3 approval time they will ship directly to the purchaser.

This is the extra options page for Mods not purchased at time of initial Pugio Purchase , there is NO discount unless selected at time of initial Pugio purchase.

Other cosmetic options and features will be added, keep checking back and remember, we are the innovator and leader in Future-Proof technologies! Your Aklys Pugio will be up-gradable at a later date even after you have taken delivery of the standard item.

Our devices are built to exceed Military Specifications to ensure that you get the best quality, reliability, accuracy, and performance out of your NFA item.

We back every item with a full lifetime warranty that you will never have to use to give you peace of mind that you are getting the very best.

As all Aklys Defense products we design and build what we would want as shooters and NFA enthusiasts ourselves, as such, modularity, upgradability and robust products are the name of the game.

The Pugio Blank firing only signal Pen AOW device is custom built by us. It is available in 22LR blank, 32ACP Blank or both with upgradability and conversion to either at any time by the user.
